

```
import java.util.*;

class Main {

    public static void main(String[] args) {

        Stack<Integer> a = new Stack();

        a.push(1);
        a.push(2);
        a.push(3);
        a.push(5);
        a.push(6);
        a.push(4);

        System.out.println("remove value " + a.pop());
        System.out.println("remove value " + a.pop());
        System.out.println(a);

    }

}
```
