

```
class HelloWorld extends Thread {  
    public void run()  
    {  
        System.out.println("thread name is HelloWorld");  
    }  
    public static void main(String[] args) {  
        HelloWorld obj=new HelloWorld();  
        obj.start();  
    }  
}
```
