

```
class HelloWorld implements Runnable {  
    public void run()  
    {  
        System.out.println("thread name is t");  
    }  
    public static void main(String[] args) {  
        HelloWorld obj=new HelloWorld();  
        Thread t = new Thread(obj);  
        t.start();  
    }  
}
```
